

Making Meeting Simpler

Yealink Meeting Server (YMS)

The increasing importance of video conferencing in modern communication means that a quality meeting management system is more important than ever. The Yealink Meeting Server is a distributed cloud-based video conferencing infrastructure tailored for HD video conferencing collaboration in the modern workplace. A powerful all-in-one meeting server, YMS brings MCU, registrar server, directory server, traversal server, meeting and device management server, SIP Trunk, WebRTC server, GK & H.460 server and Microsoft SfB (Lync) gateway together, to better provide users with an enjoyable meeting experience while cutting costs and improving efficiency. Seamlessly working with multiple devices such as room systems, video phones, mobile phones and personal computers, the Yealink Meeting Server brings people together at any time from any location with the touch of a button.

Cloud-based Video Collaboration Infrastructure

Cutting-edge Cloud-based Distributed Architecture

Based on an advanced distributed cloud architecture, the Yealink Meeting Server can be deployed locally (on-premise) or via the public cloud. The system's flexible deployment and extension supports virtualization deployment such as VMware, greatly improving the usage ratio while reducing energy consumption.

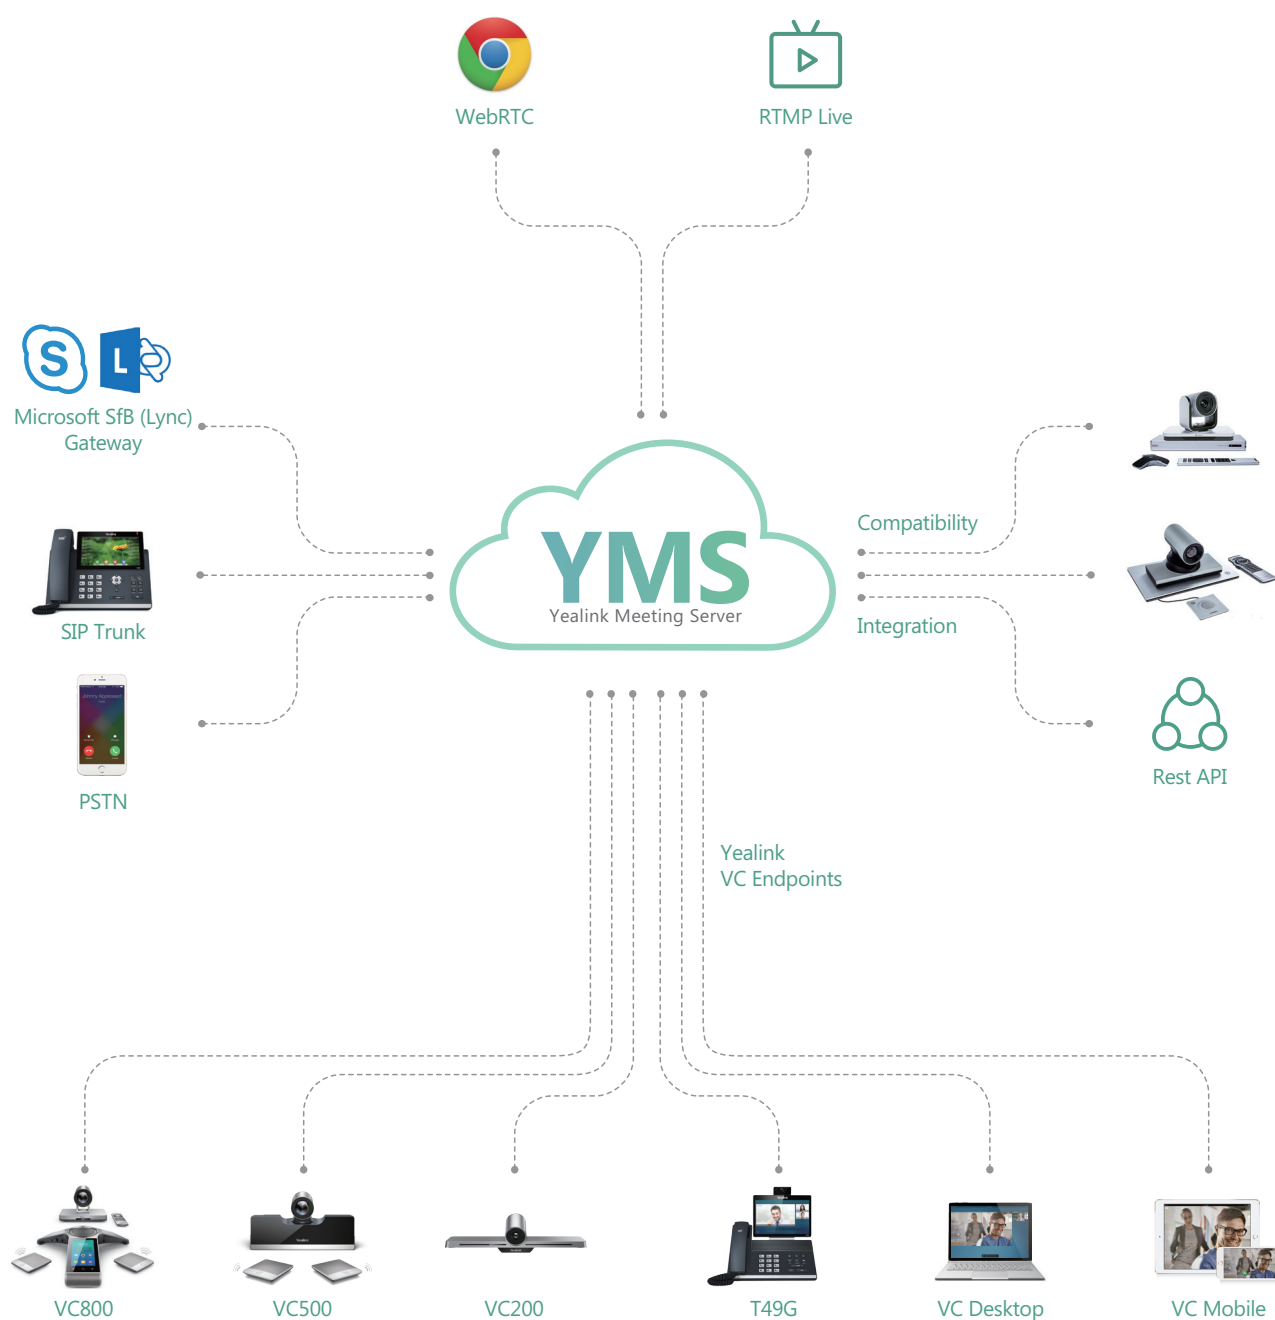

Rich Meeting Functions Enable Easy VC Collaboration

The Yealink Meeting Server supports multiple conference modes to satisfy diverse meeting demands, including P2P conference, scheduled meeting, ad-hoc conference and training mode. It enables people to schedule video conferences and meeting rooms through the Web or via Microsoft Outlook. Conference reminder and one-touch conference access are displayed on endpoints to easily engage users. WebRTC enables people to directly join video conference or share content by browser without any specialized software, hardware or configurations. Advanced conference control and organizational structure management bring customization to users to personalize video layout and send out to certain group of participants. Moreover, Interactive Broadcasting brings more engagement to training by allowing users to ask questions during a video conference.

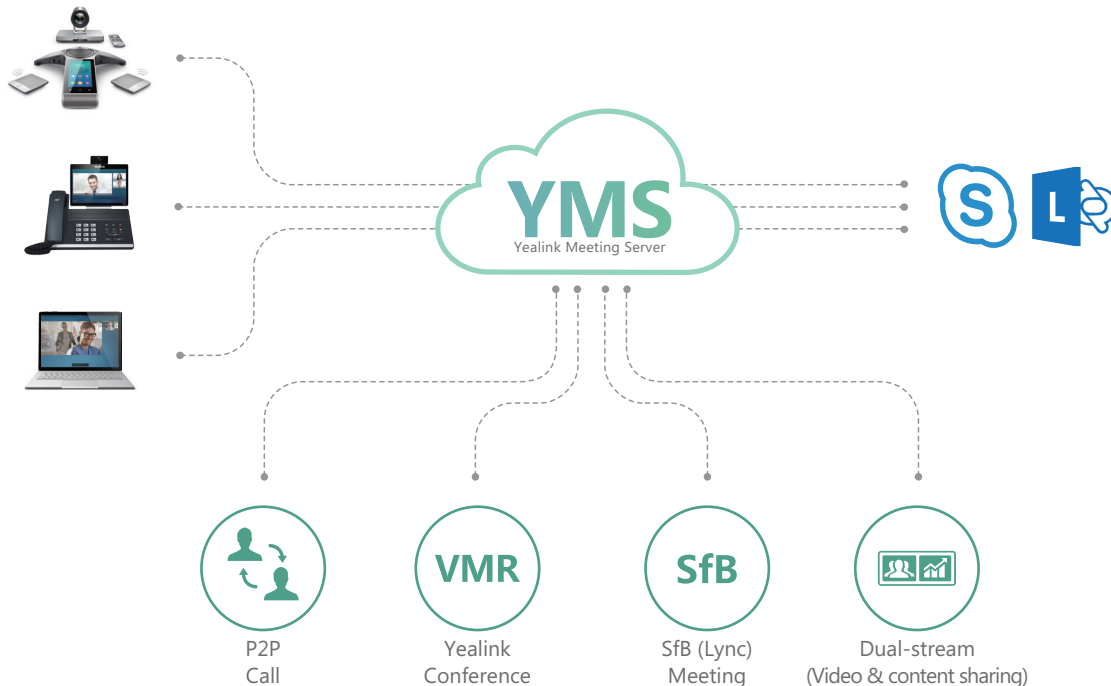

Anyone, Any Device, Anywhere

The Yealink Meeting Server integrates deeply with Yealink VC products such as the VC800, VC200, VC Desktop and T49G. It supports virtual meeting room (VMR) and the incoming call is supported via using the third-party room system based on standard SIP/H.323 protocol. The Yealink Meeting Server supports remote device management that greatly improves administrators' working efficiency and reduces enterprise maintenance costs while providing powerful system management.

Compatible with Skype for Business

The Yealink Meeting Server can act as a gateway between Skype for Business and Yealink VC devices. It not only enables P2P call between any Yealink VC device and SfB client, but also supports VC devices to join an AV-MCU meeting just like any SfB client. Presentations are supported from one participant to another.

Convenience and free

Real-time communications change when, where and how we work. YMS enables people to join video conference or share content by browser without any specialized software, hardware or configurations. Google Chrome (V52 or later) or FireFox (V52 or later) could provide better user experience.

Security and Reliability

Conference information stays secure on account of TLS, SRTP, HTTPS and dynamic passwords. With advanced traversal features ICE/TURN/STUN/NAT, the Yealink Meeting Server ensures communication reliability.

Yealink Meeting Server Specification

Features		Yealink Meeting Server
Server Module	MCU	√
	Registrar Server	√
	Traversal Server	√
	Meeting Management Server	√
	Device Management Server	√
	Enterprise Directory Server	√
	SIP Trunk Server	Video & Audio
	WebRTC Server	√
	GK and H.460 Server	√
	Microsoft Sfb (Lync) Gateway	√
Conference Capability	Concurrent Calls	By license
	Additional Audio Calls	40 ways
	Concurrent VMR	Unlimited
	Broadcasting Interactive Conference	Holding up to 1,500 participants
Communication Protocols and Codecs	Communication Protocols	SIP / H.323 / RTMP
	Dual Stream Protocols	BFCP / H.239 / RDP
	Video Codecs	H.264 High Profile, H.264, H.263+, H.263, VP8
	Audio Codecs	ARES, Opus, G.722.1C, G.722.1, G.722, G.711(μ/A)
	FEC & Bandwidth Dynamic Adaptive Adjustment	Anti 30% video and 50% audio packet loss
	Security Protocols	TLS / SRTP / HTTPS / SSH, AES-256bit
MCU Features	Universal Transcoding & Continuous Presence	√
	MCU Stack Technology	√
	Cascading Video Conference	√
	Automatic Dialing & Redialing	√
	Flexible Layouts	Equal NxN (N=2, 3, 4, 5, 6, 7), onePlusN (N=0, 4, 7, 9, 12, 16, 20) twoPlusN (N=8), Overlay and Selected Speaker
	Join With Browser	√
	RTMP Live	√
	Recording	√
	Auto Dialing & Redialing	√
	IVR	√
Meeting Management Features	Schedule Video Conference & Meeting Room	Through Web or Outlook Plugin
	Multiple Conferencings	Meet Now, P2P conferencing, Scheduled, Permanent VMR
	Training-Mode Conferencing	√
	Deeply Integrate with Yealink VC Endpoints	Sync Conference Information, Conference Reminder, One-touch Conference Access, Apply for Speaking
	Conference Control	Invite/Remove, Lock/Unlock Conference, Mute/Unmute Video & Audio, Block/Unblock Audio, Change Roles, Roll Call, Conference Banner & Subtitle, Call Statics, FECC, End Conference
	Personal Layout	Voice Activated Speaker, Video Carousel, Customized Layout and Application Target
Registrar and Traversal Features	User Accounts	Organizational Structure and up to 10,000 accounts
	Enterprise Directory Synchronization	√
	Third-party Device Registration	SIP / H.323
	Traversal Features	ICE / TURN / STUN / NAT
System & Device Management	Virtualization Deployment	VMware & Hyper-V
	Web Management	Friendly Web UI and Setup wizard
	Administrator Conference Control	√
	System Status Monitoring	Web-based real-time dashboard & Real-time data updates on capacity and system information
	System Maintenance Management	Remote Upgrade, Backup/Restore, Reboot/Factory Reset and Syslog
	Device Remote Management	Device firmware automatic upgrade and device log remote exported
	Blacklist	√
	LDAP	Synchronize directory from Microsoft AD Server
